

Demonstrate Infrastructure as a Service (IaaS) by creating a resources group using a Public Cloud Service Provider (Azure), configure with minimum CPU, RAM, and Storage.

step 1 : create resource

step 2 :type resource group

step 3 :create

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user's name 'kondapureddy.jasmithar...'. The main content area is titled 'Resource group' and features a 'Create' button. Below this, there is a section for 'More products from Microsoft' with links to 'Active Directory Health Check', 'AD Replication Status', 'Device Update for IoT Hub', and 'Front Door and CDN profiles'. The bottom of the screen shows a Windows taskbar with various application icons and a system tray displaying the date and time.

step 4 : enter resource name

The screenshot shows the 'Create a resource group' page in the Microsoft Azure portal. The page is divided into sections for 'Project details' and 'Resource details'. In the 'Project details' section, the 'Subscription' is set to 'Azure for Students' and the 'Resource group' is set to 'computing'. In the 'Resource details' section, the 'Region' is set to '(Asia Pacific) South India'. At the bottom of the page, there are buttons for 'Review + create', '< Previous', and 'Next : Tags >'. The bottom of the screen shows a Windows taskbar with various application icons and a system tray displaying the date and time.

step 5 : enter details

Create a resource group

Basics **Tags** Review + create

Apply tags to your Azure resources to logically organize them by categories. A tag consists of a key (name) and a value. Tag names are case-insensitive and tag values are case-sensitive. [Learn more](#)

Name	Value	Resource
hello	90	Resource group
hey	18	Resource group
greetings	50	Resource group
welcome	34	Resource group
		Resource group
